SKILLS

Frontend Development:

- React.js, Next.js (SSR/SSG/API Routes)
- JavaScript (ES6+), TypeScript
- HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Material UI
- Redux Toolkit, Zustand, Context API
- Responsive & Cross-browser design
- Performance optimization

Backend & Database:

- Node.js, RESTful API development
- PostgreSQL, MySQL, Neon DB, Firebase
- JWT, OAuth, RBAC
- WebSocket, GraphQL

DevOps & Tools:

- Git, GitHub, GitHub Actions
- npm, yarn
- Docker, CI/CD pipelines
- Unit & Integration testing
- Postman, VS Code

Specialized:

- OpenLayers, Google Maps, Geoserver
- i18n (multilingual support)
- PWA development
- Third-party API integration
- Agile/Scrum methodology

MOHSHIN AHAMED

SOFTWARE ENGINEER

PROFILE

Software engineer with 3+ years of experience specializing in React.js, Next.js, and TypeScript, with strong backend integration capabilities. Delivered end-to-end solutions for multiple foreign and domestic projects, managing complete development lifecycles from architecture to deployment. Passionate about building scalable, high-performance applications with clean code and modern development practices.

WORK EXPERIENCE

Tiller, Dhaka, Bangladesh

Software Engineer (Frontend)

NSD- National Sanitation Dashboard

2023 - PRESENT

DPHE, a2i, GWSC

sanboard.gov.bd

- Developed centralized WASH and sanitation data dashboard with integrations to a2i, DPHE, and IMIS, involved from RFP/EOI preparation through project acquisition and deployment.
- Participated in requirement analysis meetings with stakeholders and regular update sessions with government bodies, leading wireframe-to-development lifecycle.
- Implemented complete authentication system with **JWT**, refresh tokens, **RBAC**, password management (forgot/reset).
- Bilingual support (English/Bangla) using **i18n**.
- Designed and developed **dynamic reusable components** with state management using **Context API** and **Redux Toolkit**, creating multiple **forms with validation** and **interactive charts**.
- Seamlessly integrated with **Java backend APIs**, conducted rigorous **unit testing** and **debugging** in collaboration with backend team.
- Implemented advanced **caching** and **performance optimization** to **minimize re-renders** and enhance user experience with high **interactivity**.
- Integrated **OpenLayers map API** with **Geoserver** for geospatial visualization, configured layers and shapefile processing
- Deployed on **IIS server** and established CI/CD pipeline using Docker via Jenkins for automated testing and deployment workflows.

ACCNLDP-II (PLIS - DPP Analysis Tool)

2022 - 2023

Planning Commission Bangladesh, GIZ

- Developed **map-based** DPP (Development Project Plan) feasibility analysis platform with comprehensive authentication, **RBAC**, and precise **input validation** for critical data accuracy.
- Built extensive **geospatial features** integrating server and Geoserver APIs with robust error handling for location-specific project evaluation.
- Managed state** with Context API, designed dashboards for various user types, and implemented GIS layer customization (add/remove/modify overlays).
- Generated comprehensive **reports with maps, charts, and graphs** using three libraries ensuring map interaction and **Bangla language support**.

PROFESSIONAL COMPETENCIES

- Strong problem-solving & debugging
- Cross-functional team collaboration
- Clear technical communication
- Works well under pressure & tight deadlines
- Quick learner, adaptable to new tech
- Detail-oriented, quality-focused
- Positive attitude, team morale builder
- Self-motivated, takes initiative
- Client-facing experience

EDUCATION

2016 - 2020
DAFFODIL INTERNATIONAL UNIVERSITY

- B.Sc. in Computer Science & Technology
- CGPA: 3.82 / 4.0

B.A.F. SHAHEEN COLLEGE, KURMITOLA

- H.S.C | GPA 5/5.00 | 2015
- S.S.C | GPA 5/5.00 | 2013

LANGUAGES

- Bangla (Native)
- English (Fluent)

- Participated in client **meetings** for requirements, conducted post-deployment **training sessions** as trainer, and created user manuals for widespread adoption.
- Developed **PDF export functionality** combining maps, tables, and statistical analysis data for complete reporting.

• INCLUDE - Innovations for Climate-smart Urban Development

GIZ Bangladesh- BMZ, UNITAC

- Provided **technical assistance** in identifying urban climate challenges for innovation competition across 4 municipalities, managing complete **GoodGrants.com** platform operations.
- Designed platform pages, forms, and managed 900+ submissions including processing 800 paper-based PDFs through Excel conversion with help of **automation**.
- Developed **Next.js application with PostgreSQL** (Neon DB), Python scripts, **GitHub Actions, cron jobs, and rate limiter management** using batches and delays.
- Built and uploaded data to platform via custom Python scripts integrating with GoodGrants API, resolving technical issues with support team.
- Configured complete reviewer management system with multi-round evaluation workflows and scoring setup, generating real-time reports with charts.
- Coordinated all technical operations for 3-day Rajshahi pitching ceremony including LED screens, audio-video, web conferencing, and live scoring.

• Internal Systems & Tools Development for Tiller

- Developed **Survey Management Dashboard** web app for tracking drone surveys, 3D modeling, and map survey operations with real-time progress monitoring connected to company servers for project planning and milestone tracking
- Redesigned and migrated [company website\(tiller.com.bd\)](#) from WordPress to React, creating dynamic, faster-loading interface with component-based architecture and simplified content management for non-technical staff
- Architected and developed full-stack **Bill Management and Budget Analysis** application using Next.js, TypeScript, and PostgreSQL with role-based access control
- Built comprehensive financial management features including automated bill processing, approval workflows, payment tracking, budget variance analysis, and real-time financial projections
- Created interactive dashboards with charts and reports for project-wise cost breakdown, spending trends, and profitability analysis with alert mechanisms for budget overruns
